

To generate a field guide of local species, you will first need to search for species in your location. For this, see User Guide 1—Finding the species recorded in your area.

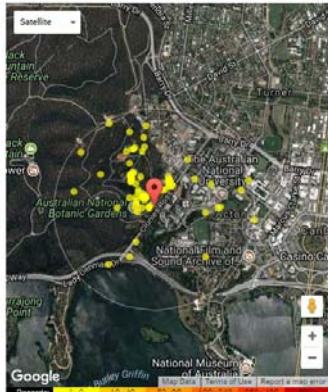

It is possible that there are a large number of species at the location. From the list on the left, choose the group that you would like to see in the field guide.

Showing records for: 50 Clunies Ross St, Australian Capital Territory 2600, Australia

Display records in a km radius

ALA User Guide 9: Generating a field guide

Again, select Species field-guide and choose a download reason from the drop down list for step 2.

Click the Species Field Guide box, then Next.

Step 1

Select your download type below, and then progress to step 2.

Occurrence records
A ZIP archive containing a comma separated values (CSV) file which includes a subset of location, taxon and event information.

SELECT

Species checklist
A comma separated values (CSV) file, listing the distinct species in the occurrence records result set.

SELECT

Species field-guide
A PDF document containing species profile information (including photos and maps) for the list of distinct species in the occurrence record set.

Step 2

Select your download reason and then click the "Next" button.

***Industry/application**

education

This field is mandatory. Choose the best "use type" from the drop-down menu above.

A field guide with only the chosen species will be generated and the link will be emailed to you.
